

DECISIONLENDER 4 OFFERS REAL-TIME, TWO-WAY CONNECTION WITH YOUR CORE

A connection between your LOS and your institution's core is integral to creating a frictionless, fast, efficient lending and account-opening process. With DecisionLender 4, you can enjoy real-time, core integration with most of the interfaces used by credit unions and banks. With this built-in connection, you can do member checks, account lookups, application autofills and more. DecisionLender 4 connects with more than 20 core systems, including:

- **Jack Henry Symitar Episys:** DecisionLender 4 communicates with your Symitar core processing system to provide a two-way interface of user-defined fields to complete member checks, send credit reports for applicants and co-applicants, create tracking records and export loan applications.
- **Corelation:** With DecisionLender 4, your LOS communicates with your Corelation core processing system, providing a two-way interface with member check, loan application export, and member account linking.
- **Finastra:** Export applicant, loan and decision data from DecisionLender 4 to Finastra and include custom fields, text file options, real-time pushes to your SFTP server, and end-to-end testing from loan origination through upload into the core processor. Then store or merge the applicant's information into the core processing system.

“

Enjoy real-time, instant core integration with most of the interfaces used by credit unions and banks.

”

“
 Connect your
 LOS and your
 core to creating
 a frictionless,
 fast, and efficient
 lending process.
 ”

- **Fiserv Portico:** The two-way interface of DecisionLender 4 and Fiserv Portico means you can export applicant information, decision status, and other user data and either store the information or merge it into your client’s core processing system.
- **Synergy with the JH imaging system and SilverLake Synergy Image Export:** With DecisionLender 4, you can receive documents such as contracts, uploaded stips, and internal, template-based files in an export, triggered by an event such as decisioning or funding.

Added Benefits Of Core Connectivity

With every core system integration through DecisionLender 4 you can expect:

- Single sign-on and application prefill, removing the need for consumers to rekey personal information, thus decreasing errors.
- eSignatures filed directly into your core system.

- New consumer account data immediately transferred to your core system, maintaining security and accuracy.
- Real-time transfer of the loan package to the core.

Why TCI?

Founded in 1982, Teledata Communications, Inc (TCI) is the provider of DecisionLender 4, a complete consumer loan origination platform (LOS). DecisionLender 4 is completely configurable, hosted in the cloud, and supports branch, online lending, indirect auto and merchant lending, and deposit account opening. The robust decisioning engine is the most versatile on the market, enabling manual or automated workflows. With over 130+ different 3rd party integrations ranging from alternative data sources, to fraud protection, to esignature and more, DecisionLender 4 truly empowers you to do business YOUR WAY!
